React Developer

Summary

Master Computer Engineer. Being a web designer and developer is my passionate. I have built different projects on the front-end side using React js framework and on the back-end side using node js and Django. I am proficient in an assortment of technologies that support my plan and desire to be a well and professional full-stack developer such as PHP, python, java, and relational Database (like MySQL and Postgresql) as well.

My greatest strengths are as follows, I am a friendly, adaptive, conscientious, and well-organized person. I have an efficient and practical approach to all tasks I undertake. I can work well in a busy environment and especially enjoy being part of a team. I am a cooperative, motivated, solution finder, easy grasper. I am always willing to learn and look for a permanent position that can help me get better knowledge and upgrade my skills

Experience

Frontend Web Developer(react js)

private

Mar 2020 - Present (2 years 1 month +)

I have built some full-stack web projects from simple up to complex and advanced projects like Blog, e-commerce with react.js framework,

Teaching Assistant

Haramaya University

Jan 2016 – Sep 2016 (9 mon)

I had been working in team leadership and giving lectures and makeup classes as voluntary, especially calculus was my favorite course.
